Mason Newell

Full Stack Web Developer

Full stack web developer specializing in both front-end and back-end development including working with servers, databases, and other back-end technologies. I enjoy creating a seamless user experience through a detailed and efficient back-end while creating a aesthetically pleasing presentation to the end user.

Work Experience

FedEx Express
Dangerous Goods Agent / Courier
May 2013-Present

As a dangerous goods agent / courier I ensure that all packages and vehicles have proper dangerous goods paperwork on board. Ensures that dangerous goods shipments are loaded and secured following both the policy and procedure of the FAA and FedEx Express.'

Education

University of California, Irvine
Web Development Bootcamp
September 2021-March 2022

Through a fast-paced bootcamp, students were taught full stack web development through the instruction of various areas of knowledge and languages. Projects were performed both individually and in groups. Fundamental concepts of web development ranging from HTML, CSS to JavaScript were taught with the utilization of API and command line prompts. The course proceeded to emphasize the connection of front-end and back-end with implementation of efficient code.

Santiago Canyon College
Computer Science
September 2016-June 2021
